

# WE ARE ALL SO BLESSED!

Our goal has always been to help and serve. The response we have received from individuals, companies, organizations, and many others are amazing and humbling. This generosity is most importantly helping our community. Dozens of seamstresses, tailors, and clothiers, who were out of work, are now able to use their professional skills to sew high quality filtration masks to help protect themselves and others. The quality masks they make are provided to frontline workers from first responders to those working in hospitals. Through the support of friends, family, business associates, corporations, and many other generous individuals we thank you from the bottom of our hearts. We have listed several as an appreciation of their support.

Our pledge is to continue to make high quality masks and products, to put people back to work and to protect the frontline workers and all individuals.

We have unfortunately entered a new normal and it is likely all of us will have to wear a mask for some time. We hope you consider our quality masks made right here in America to help us continue to reach toward our goal of helping and serving our community.

## THANK ALL OF YOU FOR YOUR SUPPORT!

### RAD.BIO TEAM

A small sampling of the people we are grateful for that have helped!
